Here I am...

I am a person who likes challenges,
a person able to collaborate, but also able to work independently,
always trying to reach the setted goals.
I have a diploma as a computer science, after graduation I moved to
London, where I worked for a year and half in the catering sector,
with the aim of improving my knowledge of English.
back in Italy I followed some specialization courses in web development
and graphic design.
I am also used to working with foreign teams on international projects,
actually for example I am working with colleagues who come from Mumbai,
Orléans, Boston and tunis
I am a lover of aesthetics, I consider myself a person
very meticulous.

today

Qualifications

During the school period
i got network programming certificates from cisco.

Graduated as a computer science. Achieved in Venice with a score
of 76/100

As a thesis for my exam I created and presented a
Multitouch Mini using a software called Community Core Vision
(CCV) along with other pieces of code written by me in C ++.
